100cc and 400cc bulb reservoirs with exudate disposal bag

100cc reservoir kit with flat silicone drain with trocar

Jackson-Pratt® 100cc and 400cc Silicone Bulb Reservoirs and Reservoir Kits

For procedural flexibility, Jackson-Pratt® 100cc and 400cc Reservoirs are available separately for use with all Jackson-Pratt® Wound Drains or in convenient kits packaged with Jackson-Pratt® Flat or Round Wound Drains.

Jackson-Pratt® Reservoirs feature:

- Silicone walls to provide easy activation of suction
- Internal anti-reflux valve to help prevent backflow of fluid to the patient
- Clear reservoir and graduations that make it easy to identify and measure exudate
- Latex-free construction
- 100cc bulb that features a Luer lock emptying port which connects directly to either a Luer lock syringe for collection of a culture sample or to an exudate disposal bag (cat. no. SU130-5005) to provide a closed system for safe disposal of exudate
- 400cc bulb that features dual-inlet ports to allow connection of two drains without a y-connector
- 400cc bulb with a threaded outlet port that connects directly to an exudate disposal bag (cat. no. SU130-6005) for safe disposal of exudate

Cat. No.	Description	Perforation
----------	-------------	-------------

100cc silicone bulb reservoir (10/bx)

SU130-1305	100cc reservoir only	n/a
------------	----------------------	-----

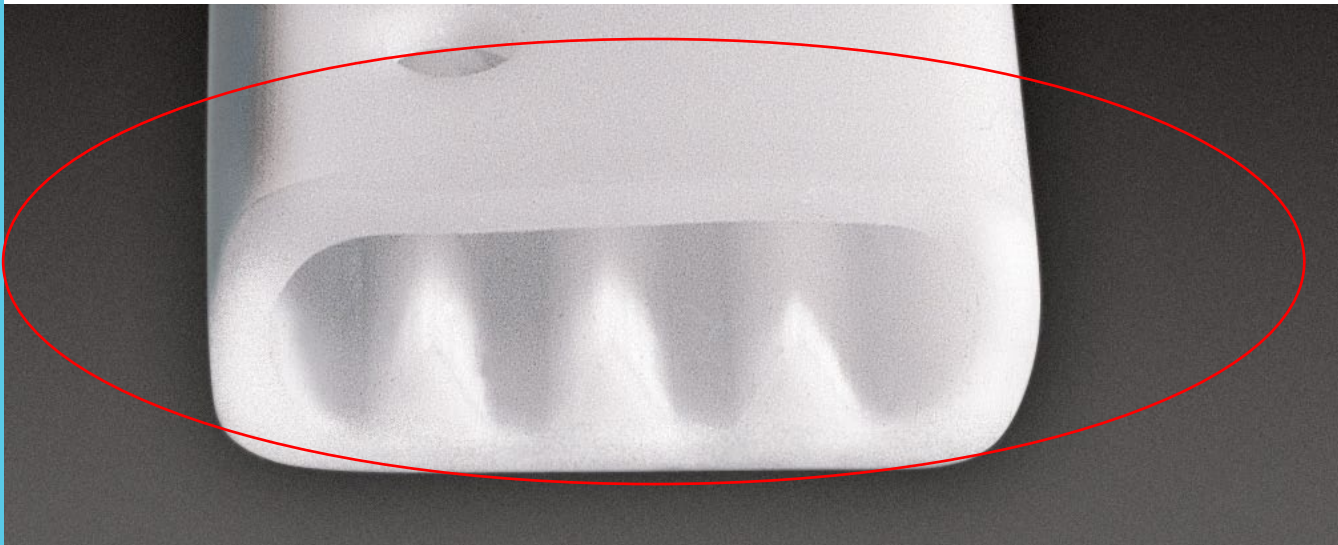

400cc silicone bulb reservoir (10/bx)

SU130-1000	400cc reservoir only	n/a

Jackson-Pratt® Silicone Flat Drain

Jackson-Pratt® Silicone Flat Drains

Jackson-Pratt® Flat Drains are made of a silicone elastomer for softness and flexibility, featuring:

- Injection molded for strength and drain integrity
- Low-profile, hubless design to help promote tissue plane approximation
- Inner lumen ribbing to help prevent drain collapse and clogging and help preserve drain patency
- Silicone that is barium impregnated for x-ray detection of drain

Cat. No.	Drain size	Perforation
Flat silicone drains without trocar (10/bx)		
SU130-1308	7mm x 20cm	¾
SU130-1309	10mm x 20cm	¾
SU130-1310	7mm x 20cm	full
SU130-1311	10mm x 20cm	full

3-Spring Reservoirs and accessories

Jackson-Pratt® 3-Spring Reservoirs are available in convenient kits with PVC drains or separately with silicone adapters for connection to any of the Jackson-Pratt® Silicone Drains.

The reservoirs feature:

- 3-spring design to provide easy activation of suction
- Anti-reflux valve in reservoir which helps prevent backflow of fluid to the patient
- Transparent sidewall with clearly marked graduations for quick and easy identification and measurement of exudate
- Latex-free construction
- Universal wound drain y-connector which can be cut to accept $\frac{3}{32}$ ", $\frac{1}{8}$ ", $\frac{3}{16}$ " or $\frac{1}{4}$ " diameter wound drains
- Kits include center perforated PVC drains with trocars

Cat. No.	Description	Qty.
3-spring reservoir kits with trocar		
SU130-401D	7 Fr ($\frac{3}{32}$ ") PVC drain	12/cs
SU130-402D	10 Fr ($\frac{1}{8}$ ") PVC drain	12/cs

Channel Drains

32 Fr, 28 Fr and 24 Fr hubless silicone round drains

Jackson-Pratt® Hubless Channel Drain

Jackson-Pratt® Channel Drains are available in a variety of sizes and styles, both with and without trocars and feature:

- A four-channel design that allows for better drainage than traditional perforated drains
- Silicone material to improve patient comfort while providing high tensile strength
- No-hole design to minimize tissue ingrowth, providing greater patient comfort upon drain removal
- Available in both one piece and two piece styles

Cat. No.	Drain Size*	Channels	Trocar Size
Silicone flat drain without trocar (10/box)

Hemaduct® Flat Drain

Hemaduct® Round Drain

The Jackson-Pratt® brand Hemaduct® Wound Drain is uniquely designed with a system of multiple ducts (channels) and lumens that are interconnected through a series of internal portals.

This advanced design offers the following advantages:

- Provides more effective distribution of suction and fluid flow over the entire drain
- Improves collateral drainage by providing alternate pathways around obstructions
- Minimizes aspiration of delicate tissue and clot infiltration with narrow ducts and recessed portals
- Lessens patient discomfort during drain removal by helping prevent tissue ingrowth
- Hemaduct® Drains are made of soft silicone and are available in round and flat styles, with or without a trocar

Cat. No.	Drain Size*	Ducts	Trocar Size
----------	-------------	-------	-------------
