AVAILABLE IN
13G & 10G

Mammotome elite

tetherless vacuum-assisted biopsy system

smart. reliable. efficient.

Mammotome

Mammotome elite

tetherless vacuum-assisted biopsy system

Mammotome elite is the only single-insertion, tetherless device with TruVac vacuum technology.

Combining vacuum-assisted biopsy tissue quality with the ease and speed of a core needle, Mammotome elite is raising the bar in breast biopsy.

Select Grip
Allows you to choose one of three preferred hand positions

Removable Cannula
Integrated coaxial cannula facilitates efficient and accurate placement of tissue markers

Needle Rotation
360-degree needle rotation allows you to adjust orientation of needle aperture based on position and approach to lesion

Probe Aperture
13G and 10G needle options provide the flexibility necessary to accommodate a wide variety of diagnostic breast biopsy needs

Single Insertion
Non-firing bladed insertion tip moves easily through tissue while maintaining control of the needle minimizing time required between tissue samples

Introducer Stylet
A compact design and bladed insertion tip maximizes control during insertion with a simple, one-handed release to maintain focus on the procedure

Stylet tip length aligns with probe tip length to ensure proper aperture placement for biopsy

TruVac
Provides large tissue samples resulting in a reliable diagnosis; reliably transports tissue from the biopsy site to the collection cup

Collection System
Quick release design of basket expedites tissue removal process; clear cup provides visualization of tissue; 3-piece system enables touchless transfer of tissue to pathology

smart
designed for ease-of-use

reliable
designed to enable a reliable diagnosis

efficient
designed with procedural speed in mind
